### Technical Specification

Product	Model No.	Input Voltage (V/AC)	Power (W)	Body Colour	Dim (mm)
	<b>SELK1500EX3</b>	240	2.8	WHITE	310(L) x 62(W) x 213(H)

Important notes: (1) Battery warranty twelve (12) months (2) In the interest of transport and safety, emergency products are supplied with the battery disconnected. (3) In addition to specific emergency commissioning instructions, the battery MUST be connected at the time of installation. (4) Continual use in emergency mode greater than 240 hours without recharge, will result in battery failure and void battery warranty.

Due to continued product and technology enhancements, data sourced from sal.net.au shall not form part of any contract and or technical performance guarantee unless expressly confirmed in writing by SAL at the time of order. Products are sold in accordance with [SAL Terms and Conditions of sale](#) and all images shown are for illustration purposes only and may vary from the actual colour or finish. Unless specifically stated, all IP ratings nominated for Interior products are from "below the ceiling".

### Dimensions

Why is the IP rating important? In brief, IP (Ingress Protection) ratings are defined in EN 60529 and simply defines the ability of an electrical product to seal and protect against the intrusion of foreign objects and water.

(I) As the first numeral stands for intrusion of a foreign object, where (P) as the second numeral stands for the penetration of moisture.

As a guide IP20 rated products would be seen in interior spaces with no requirement for protection against the elements, where an IP65 product would be found in an exterior application which required substantial protection against the elements.
